Abstract

PURPOSE: To provide the method of carbonizing/incinerating treatment of sludge and the like and the device therefor, capable of carbonizing and incinerating matters to be treated, comparatively inexpensively and at a very small expense for fuel.

CONSTITUTION: The carbonizing/incinerating treatment of sludge and the like is effected by a method wherein a single combustion furnace 2 is employed and the carbonizing and incinerating treatments are effected by regulating the supplying amount of combustion air A, supplied into the combustion furnace 2. On the other hand, the carbonizing/incinerating treatment device 1 of the present invention is provided with only one combustion furnace 2 while the supplying route 18 of combustion air is constituted of a route 18T for carbonizing and another route 18S for incinerating.
